SE Pasture Pro

A specialised natural protein supplement, supplying minerals & vitamins including Biotin for all livestock grazing crops and pasture in the Southeast of South Australia

The Southeast of South Australia is famous for its incredible history of prime agriculture. Renowned for its farming, arguably producing some of the best beef / lamb & wool on the planet.

Four Season believes that the SE deserves a specialised pasture supplement designed to accompany sheep/ cattle grazing the rich pasture throughout the region. Working with local farming specialists, we have manufactured a bespoke supplement that matches the nutritional needs of ruminants throughout the region. Ideally feed 365 days through the year. Just set and forget. Animals will take what they need, when they need it, helping to maximise the genetic potential of highly productive animals well known throughout the famous Southeast.

Carefully formulated and balanced with a range of minerals and trace minerals particular to South Australia. SE Pasture Pro is the professional livestock producers' choice for best results.

Typical Analysis*		
Natural Protein / Protein Meal	400g/kg	40.0%
Molasses	80g/kg	8.0%
Min Crude Protein	134g/kg	13.4%
Min Total Protein	134g/kg	13.4%
Mineral Analysis		
Salt (NaCl) Max.	300g/kg	30.0%
Calcium (Ca)	63g/kg	6.3%
Sulphur (S)	28g/kg	2.8%
Magnesium	20g/kg	2.0%
Copper (Cu)	2500mg/kg	
Zinc (Zn)	1227mg/kg	
Selenium (Se)	26.8mg/kg	
Cobalt (Co)	420mg/kg	
Manganese (Mn)	28mg/kg	
Iron (Fe)	120mg/kg	
Biotin	1000mg/kg	

Note: The above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.

Pack Size	20kg & 90kg Blocks
Average Consumption	
Cattle	20KG: 4 blocks per 100 head 7 days 90KG: 3 blocks per 100 head 21 days
Sheep	20KG: 4 blocks per 100 head 21 days 90KG: 1 block per 100 head 21 days

Also suitable for goats, horses and deer

Replace immediately when consumed.

Note: Average block consumption will increase in highly phosphate deficient areas and with poor quality feed.
