Ewe & Lamb

A protein / nutrition supplement for ewe & lambs

With the successful explosion of the Australian lamb market, producers now must ensure that their lambing percentages are maximised. It all comes down to the quality of nutrition for the lambing ewe. Ewe & Lambs new technology depends on feeding high quality Natural protein / Protein meal and macro minerals to ewes prior, during and after lambing. By feeding ewes 6-8 weeks prior to lambing, colostrum levels are improved in lambing ewes, which in turn, leads to improved lambing weights and results in higher survival rates.

Healthy and heavier lambs mean more money in the bank, and that is where EWE & LAMB becomes an important management tool for lamb producers. By supplementing pasture with high quality nutrients in EWE & LAMB, ewes have a convenient and quality nutrition source available 24 hours a day when they need it, which improves digestion of forage as well as helping to supply valuable minerals and protein. Considering that many ewes are able to produce twin lambs, extra supplementation using EWE & LAMB is a wise economic choice in ensuring that ewes can express their full genetic potential in successfully mothering twins to weaning.

Pack Size

20kg Blocks

Average Consumption

Sheep

4 blocks per 100 head for 20 days

Replace immediately when consumed.

Note: Average block consumption will increase in highly phosphate deficient areas and with poor quality feed.

Typical Analysis*

Natural protein / protein meal	300g/kg	30.0%
Molasses	80g/kg	8.0%
Total Minimum Crude Protein	100g/kg	10.0%
Mineral Analysis		
Magnesium (Mg)	50g/kg	5.0%
Salt (NaCl) Max	300g/kg	30.0%
Sulphur (S)	25g/kg	2.5%
Calcium (Ca)	80g/kg	8.0%
Phosphorus (P)	18g/kg	1.8%
Zinc (Zn)	1140mg/kg	
Iodine (I)	680mg/kg	
Selenium (Se)	22mg/kg	

Also contains: Copper (Cu), Cobalt (Co).

Note: The above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.

EWE & LAMB
A nutrition supplement for lambing ewes

This block should be fed out to ewes before, during and after lambing. For maximum benefit this supplement should be fed out for a further two months after all lambing has been completed.

*TYPICAL ANALYSIS	
Natural protein / protein meal	300g/kg 30.0%
Molasses	80g/kg 8.0%
TOTAL MINIMUM CRUDE PROTEIN	100g/kg 10.0%
MINERAL ANALYSIS	
Magnesium (Mg)	50g/kg 5.0%
Salt (NaCl) Max	300g/kg 30.0%
Sulphur (S)	25g/kg 2.5%
