# Prolamb

## A high energy/mineral/trace element nutrition block for lambing ewes and lambs

Australian sheep genetics are leading the world in productivity. With a market now hungry for clean grass-fed red meat products, Australian lamb is set to provide excellent protein to meet such projected large demand.

With their advanced genetics, more ewes are now capable of rearing quick growing twins whilst growing a superb wool fleece, whether merino or crossbred. Extra nutrition is required besides pasture if full genetic potential is to be maximised

Pro lamb is a new generation molasses supplement, designed to give a 24-hour energy source, whilst also delivering key nutrients to high performing ewes and lambs. Lambs will also be able to take the block safely, allowing earlier rumen development to happen, allowing key elements such as magnesium and calcium to be accessed easily.

### Typical Analysis\*

Molasses	500g/kg	50.0%
Calcium (Ca)	60g/kg	6.0%
Phosphorus (P)	22g/kg	2.2%
Sulphur (S)	11g/kg	1.1%
Magnesium (Mg)	44g/kg	4.4%
Salt (NaCl) Min	50g/kg	5.0%
Salt (NaCl) Max	60g/kg	6.0%
Natural protein/protein meal		5.0%
<b>Total min. crude protein</b>	<b>31.7g/kg</b>	<b>3.17%</b>
Zinc (Zn)	810mg/kg	
Selenium (Se)	22mg/kg	
Cobalt (Co)	100mg/kg	
@ (Φ)	mg/kg	

**Note:** The above analysis represents the constituent ingredients and relative proportions of the typical product only. Actual constituent ingredients and relative proportions may vary from that outlined above.

<b>Pack Size</b>	<b>20kg Blocks</b>
<b>Average Consumption</b>	
Sheep	4 blocks per 100 head

To be fed out prior to lambing. Continue feeding until lambs are weaned/ready for market. Replace blocks when consumed.

**PROLAMB®**

A premium nutrition / energy supplement for ewes and new lambs on pasture

**RECOMMENDED FEEDING RATES**  
**SHEEP** - 4 blocks per 100 head  
 To be fed out prior to lambing. Continue feeding until lambs are weaned/ready for market.
